From Reference Direction Table

Citations that are in a series like (a, et al,; b; c) are not found.

If the citation has & and the reference uses and it is not matched.

Instead of just saying not in alphabetical order can you list those that are not?

Look for [first author] et al in the **Other Citations for Author code as if three authors students use et al. incorrectly**

LightGuide – not a parsed reference by RefExtract but could do a Python search for string in references text

Yafimava, D. (2019). "Blockchain In the Supply Chain: 10 Real-Life Use Cases and Examples." OpenLedger. Available at: https://openledger.info/insights/blockchain-in-the-supply-chain-use-cases-examples/ (Accessed: 18 December 2023).
Yafimava – the fi is somehow one character when goes through word to PDF to text process and what you cut&paste from web results (fi is one character) is not found in PDF – very subtle! The text string in the References web output is found but not the text string in the citations web output…
